

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

JAPAN—*Formosa*.—Month of February, 1905. Estimated population, 2,922,585. Total number of deaths not reported. One death from diphtheria, 3 deaths from enteric fever, and 169 deaths from plague reported.

SWITZERLAND.—Reports for the two weeks ended February 25, 1905, from 18 cities and towns having an aggregate population of 827,000, show a total of 788 deaths, including diphtheria 7, enteric fever 3, measles 22, scarlet fever 8, whooping cough 10, and 93 from phthisis pulmonalis.

WEST INDIES—*Curaçao*.—Two weeks ended March 17, 1905. Estimated population, 31,600. Total number of deaths, 15. No contagious diseases reported.

St. Thomas.—Three months ended December 31, 1904. Estimated population, 11,012. Total number of deaths, 260, including diphtheria 1, enteric fever 5, and 9 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 31, 1904, to April 7, 1905.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 25 to December 30, 1904, see PUBLIC HEALTH REPORTS for December 30, 1904.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
